The project invests in south Korean companies that are significantly exposed to the domestic market and are operating in infrastructure and consumption businesses. These are the areas that could benefit the most from a reconciliation between South Korea and North Korea. Korean domestic stocks are the most attractive worldwide from a valuation standpoint and the likely imminent inclusion of South Korea among MSCI developed markets could be the catalyst for a significant repricing. The event of reconciliation provides the project portfolio with a further powerful free option to which today Mr Market assigns zero probability. However, as we are used to learn, geopolitical events can hardly be anticipated...

Korean equity: a significant opportunity...

PROJECT NJ KR Portfolio Valuation at exit (as for valuation gap report) after rerating of 90% on cautious assumptions

Source: NicheAM

90% potential rerating on following assumptions:

Exit 2026

No reunification/reconciliation (rapprochement)

No inclusion of SKorea in the MSCI Developed Countries

Nominal EPS growth '23-'26E of just 8%

Modest market rerating of 20% (still >30% upside to MSCI World Value despite better growth outlook)

+ FREE OPTION

In case of reconciliation (rapprochement) between North and South Korea the upside could be above 150% for the portfolio (see presentation for further details). In fact it is composed by companies that would benefit from the massive investments in infrastructure and the increase in consumptions related to the North Korea opening of the economy (as it was the case decades ago for countries like China and Vietnam)

Kospi general Index vs NJ Korea Reunification portfolio

- Less than 25% in weight of the companies included in the **Kospi** have more than 50% of sales in the South Korean market
