The project invests in south Korean companies that are significantly exposed to the domestic market and are operating in infrastructure and consumption businesses. These are the areas that could benefit the most from a reconciliation between South Korea and North Korea. Korean domestic stocks are the most attractive worldwide from a valuation standpoint and the likely imminent inclusion of South Korea among MSCI developed markets could be the catalyst for a significant repricing. The event of reconciliation provides the project portfolio with a further powerful free option to which today Mr Market assigns zero probability. However, as we are used to learn, geopolitical events can hardly be anticipated...

## **PROJECT NJ KR EQUITY PORTFOLIO Valuation (as of 14 May '24 )**

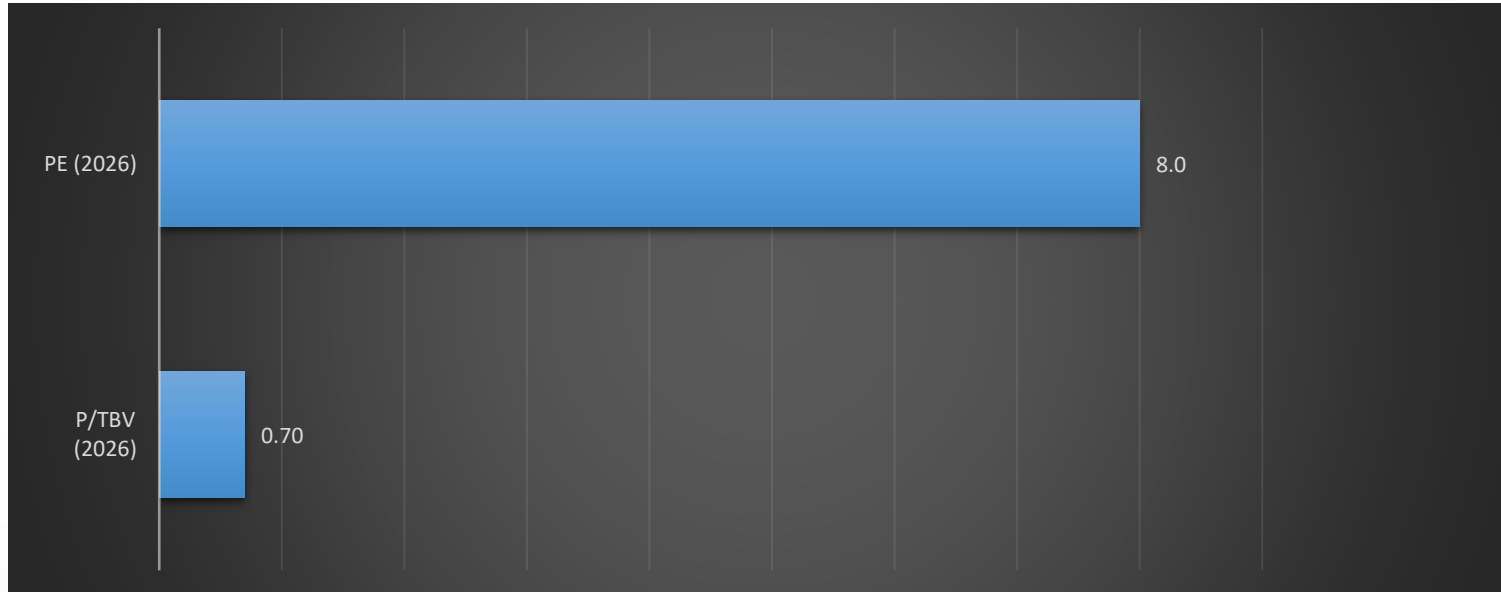

\* Last available

\*\* Forward estimate, if available, otherwise the latest data

Source: NicheAM, Refinitiv

# PROJECT NJ KR Portfolio Valuation at exit (as for valuation gap report) after rerating of 90% on cautious assumptions

Source: NicheAM

90% potential rerating on following assumptions:

Exit 2026

- No reunification/reconciliation (rapprochement)
- No inclusion of SKorea in the MSCI Developed Countries

Nominal EPS growth '22-'26E of just 8%

Modest market rerating of 20% (still >30% upside to MSCI World Value despite better growth outlook)

## + FREE OPTION

In case of reconciliation (rapprochement) between North and South Korea the upside could be above 150% for the portfolio (see presentation for further details). In fact it is composed by companies that would benefit from the massive investments in infrastructure and the increase in consumptions related to the North Korea opening of the economy (as it was the case decades ago for countries like China and Vietnam)

## Kospi general Index vs NJ Korea Reunification portfolio

- The **Kospi** general index, the most popular and inclusive index of South Korea equity, includes in weight less than 10% of the stocks that are part of **NJ Korea Reunification** portfolio
- 100% of the companies included in the portfolio of **NJ Korea Reunification** project record more than 30% of total sales in the domestic market, and more than 85% in weight of the companies included in the portfolio of **NJ Korea Reunification** project record more than 50% of sales in the domestic market
- Less than 25% in weight of the companies included in the **Kospi** have more than 50% of sales in the South Korean market
- The portfolio of **NJ Korea Reunification** suffers more than the Kospi from a weakening of the Korean currency, and viceversa, as its investee companies are more domestic oriented
- The portfolio of the **Kospi** benefits more than the **NJ Korea Reunification** from the global economic expansion and viceversa
- The portfolio of **NJ Korea Reunification** benefits more than the portfolio of **Kospi** from the Korean economic expansion and viceversa
- The portfolio of **NJ Korea Reunification** will benefit more than the portfolio of **Kospi** from the inclusion of South Korea in the MSCI Developed Countries Index
- The portfolio of **NJ Korea reunification** will benefit extremely more than the portfolio of **Kospi** from a rapprochement between North Korea and South Korea
