The project invests in south Korean companies that are significantly exposed to the domestic market and are operating in infrastructure and consumption businesses. These are the areas that could benefit the most from a reconciliation between South Korea and North Korea. Korean domestic stocks are the most attractive worldwide from a valuation standpoint and the likely imminent inclusion of South Korea among MSCI developed markets could be the catalyst for a significant repricing. The event of reconciliation provides the project portfolio with a further powerful free option to which today Mr Market assigns zero probability. However, as we are used to learn, geopolitical events can hardly be anticipated...

Korean equity: a significant opportunity...

Korean equity market almost flat (USD) since 2007

BUT

Korean GDP +48% (USD) since 2007!!!

The most undervalued market worldwide
