Project Investment Manager:	Niche Asset Management Ltd – www.nicheam.com

The project invests in Indonesian Small Cap companies exposed to the country's massive infrastructure plan.

This asset class is trading at depressed levels in absolute terms despite the rosy growth outlook for the country: Indonesia is the 7th largest economy in the world and has its 4th largest population. Its territory is huge, fertile and rich in commodities. The weather and thousands of pristine beaches make it ideal for tourism. By emerging market standards, both the institutional framework and corporate governance are good. The Central Bank is independent, public debt is low, inflation is under control and economic growth healthy.

This market niche is also trading at a significant discount to the big caps. The fact that there are no financial products (ETF or UCITS funds) on the asset class is clearly one of the reasons for that.

The investment case bears strong similarities to what happened with Indian small caps, which over the last few years benefited from a strong rerating as the outlook for the Indian market improved.

PROJECT NJ INDONESIA INFRASTRUCTURE Small Cap : a valuation anomaly

Indonesia is a country with solid fundamentals - considering the growth potential, the valuation of Indonesia's big caps is attractive while the valuation of its small caps is even more so

The Small Cap universe represents a valuation anomaly

This asset class is trading:

- at depressed levels in absolute terms despite the rosy growth outlook
- at a strong discount to the big caps

... and the fact that there are **no financial products on this asset class** is clearly one of the reasons

Powerful catalysts

→ **Infrastructure plan:** 400bln USD to be spent (about 35% of GDP)

→ **Supply chain diversification from China**

→ **EV materials**

→ **India equity market catch-up**

PROJECT NJ INDONESIA INFRASTRUCTURE Small Cap at exit (as for valuation gap report) on cautious assumptions

Upside at project closure: 75%
This corresponds to 13.4x earnings (Indonesia's big caps valuation as of today)

We remain cautious and do not incorporate a potential re-rating towards India's small caps (which trading at 22.8x earnings would imply a further **70% upside**).
And we do not consider either the expected mid-term EPS growth of about 12%, which would imply a **further 70% upside** in 5 years' time.

Frozen Stocks

Name	Reason for freezing
PT Bank Woori Saudara Indonesia	Woori Bank recently identified a major credit fraud involving its Indonesian subsidiary, Bank Woori Saudara, with losses amounting to \$78.5 million linked to falsified letters of credit from a local export firm. While the company is cooperating with authorities and pledges to repay the debt, the case exposed weaknesses in internal controls and risk management. The bank's stock has been frozen on 09/06/2025 due to the material nature of the fraud and ongoing risks, with no set timeline for resumption or resolution. No deadline and no liquidation date are set.
